

ENDLESS NOTES (/w CHOKE)

This Max for Live creates 'endless' notes - meaning a note will last as long a new note (with any pitch) will be played. This becomes handy if you trigger notes and don't want them to stop before the next note is being triggered e.g. atmospheric chords. However you can stop the current note by clicking on the "NoteOff" button. Which you can MIDI MAP or automate.

Monitor for currently playing note pitch.

Click here for stopping the currently played note.

Change "NoteOff" button behaviour in MIDI/key map mode between momentary/toggle mode.
