

MIDI CLIP QUANTIZE

Via this Max for Live device you can quantize all MIDI notes start points of the currently selected MIDI clip - just one selected MIDI clip would work! This becomes handy if you record some MIDI live in a live performance and quickly want to quantize the just recorded clip to a certain value e.g. by having several buttons mapped to several buttons each 'firing' a different quantization. This device needs to be placed on the track the addressed MIDI clip is on.

"Fire" quantization e.g.
via ext. MIDI controller

Set quantize values

When using MIDI MAP mode for
using ext. MIDI controller to
change kits - change the buttons
between momentary/toggle
mode.
