

Simple Threshold

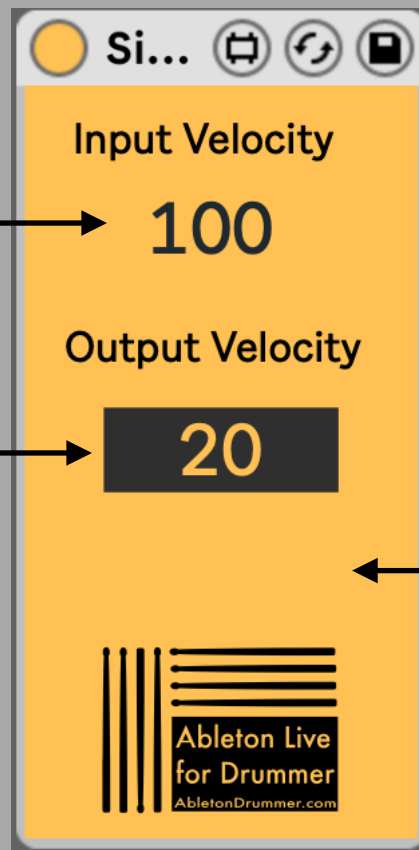

The SIMPLE THRESHOLD device will block all MIDI notes which velocities are under the set threshold value.

INPUT MONITOR

All MIDI notes ON velocity will be shown here.

THRESHOLD

Set the threshold here. All notes with a velocity from this value and above will be passed through.

YELLOW FLASH

If a note is passed through (=hitting 'above' the threshold) the hole device will flash up yellow.

[This device is included in the Velocity Devices Pack - Check it out here!](#)
